

Disaster-Supply Kit Checklist

A disaster-supply kit should provide a collection of basic items that household members may need in the event of a disaster. A disaster-supply kit can be used in your home if there is an extended power outage or it could be used if you have to leave your home and go to a shelter. During an emergency, you will probably not have time to shop or search for the items you need.

A basic disaster-supply kit should include these recommended items:

- Water, one gallon of water per person per day for at least three days, for drinking and sanitation
- Food, at least a three-day supply of non-perishable food
- Battery-powered or hand crank radio and a NOAA Weather Radio with tone alert and extra batteries.
- First aid kit
- Whistle to signal for help
